# DENEb Discovery Conference

## Discovery Conference Launches eDENEb Cloud-Based Construction Management System

DENEb's 2013 Discovery Conference showcased its innovative Cloud-based Construction Management system, eDENEb.

A Construction Management Software innovator for more than 25 years, DENEb's latest Cloud-based program provides enhanced cost-management capability for a wide range of Construction management requirements.

DENEb is known for its customer responsiveness, developing feature after feature that matches the muscle of technology with the Job Cost management needs of its clients.

"This eDENEb product has kept all the great capabilities of the of the legacy DENEb software program and combined it with the flexibility that Cloud Computing brings to the mix," remarked David Baker, CFO of Ontario Mechanical. "Being able to see the progress of all our jobs in real time is a big advantage for us."

## “Real Time” Job Cost Monitoring is a Conference Highlight

Mindy Simes, Reliable Construction, and a 20 year user of the DENEb software products attended the conference to learn about what are the newest aspects. “It is good to see that the eDENEb product retains all the great data integration features, but with a different, more flexible delivery system.”

Linda Flora, Brumbaugh Construction, echoed those sentiments. “I like the idea that we can now work across multiple time periods...input January data so we don’t fall behind while waiting for year-end data from the prior December. And we don’t have to wait till the end of a month to run reports on any job in progress. That will be a big help.”

Ontario Mechanical’s CEO Ken Earhart was impressed with the control that Cloud computing brings to his company. “To access comprehensive Job Cost data across all our projects in “real time” is ‘huge’ to me. If I can check up to date job details at home in the evening I don’t have to keep thinking about what might be happening...I can start planning my next move instead of worrying about the unknown.”

Conference Presenter  
David Coggins, President, DENEb, Inc.

---

*All of us at DENEb Software wish to express our appreciation to the Discovery Conference participants and all of our customers for their on-going input and guidance.*

*Our business model is 100% customer-centric: our success depends on creating and supporting software that makes our customers more efficient and profitable.*

*We thank you all for the rich and rewarding dialogue that defines our customer relationships.*

*Ken Lykins, David Coggins  
and the DENEb Software Team*
